illumit

About illumit.

illumit are a specialised provider of business-focused end to end IT services, based in Birmingham, UK. We have considerable depth and breadth of experience across a number of industry sectors. We understand how to solve the problems faced by organisations today and understand the nature of change from technical and personal perspectives.

We are very proud of our open and honest work ethic and work hard to be considerate, approachable and friendly. We believe that open communication promotes healthy business relationships.

We help and support regional and national businesses and healthcare providers, from 5000 end users to 5. Contact us to find out how we can help you.

Services.

We provide life-cycle solutions for IT networks, from conception and design through to implementation and ongoing support.

This means that we can help you with your project and support requirements, covering network infrastructure and cabling, network security, server and back-office environments (including directory services) right through to end-user desktop and laptops.

We also offer other services, including back-office and enterprise platform upgrades and migrations, and will be happy to discuss your Microsoft, Novell, Citrix, Apple Macintosh and Linux environment and/or requirements. Contact us with your enquiry.

Solving your problems

Our certified engineers, project managers and analysts are experienced with Microsoft, Novell, Citrix, Apple and Linux technologies. We have something of a reputation for solving complex issues with which others have struggled - with the customer testimonials to prove it. We are capable of showing flair and creativity in systems and network design, planning and installation.

We also provide services in the areas of IT audit and appraisal, Project Management, Web design and hosting, Training and Courseware and Business Requirements Analysis.

Our skill set includes more than just these items. If you have an enquiry regarding a requirement not addressed here, please contact us.

Technical Support.

Businesses need help as they change; we work hard to minimise risk and maximise benefits from new and existing technology as you move forward.

At the heart of a relationship with **illumit** is a flexible support contract, or service level agreement (SLA), designed to prioritise the way our team responds to your requirements. In short, we respond with the appropriate service level (and cost) for your needs.

Should you choose to benefit from ad-hoc support and consultancy services without a contract, a competitive tariff is available, with fixed price and daily/hourly rate options to suit your requirements. Please contact us for more information.

Design and Development.

Our consultancy philosophy is built on understanding your requirements. We appreciate the need to tailor solutions to suit individual circumstances.

Whatever your scenario, **illumit**'s consultants are always ready to listen and will strive to surpass your expectations. Highly skilled, certified network engineers, software developers and project managers work alongside each other to ensure this commitment is met.

We offer bespoke client/server and web-based application development, predominantly using Visual Basic and SQL Server, although we are also comfortable with Access, Oracle and Ingres RDBMS.

We also offer web site design and development please contact us for more information.

Public Sector.

With over 25 years combined experience of bringing benefits to the NHS, we have a unique insight into Europe's largest employer in a state of constant change. Supporting Primary, Secondary and Tertiary care providers with everything from full network installation and Active Directory migrations to bespoke database development means an unrivalled service offering.

Our customers include Strategic Health Authorities, Shared Services Agencies, Acute Trusts, Community Trusts, Mental Health Trusts, Primary Care Trusts and GP Practices.

We also support a major youth charity and its 115 agencies across England.

Private Sector.

illumit has a strong presence in the Professional Services sector, based on supporting several legal and business support services organisations. Working closely with other IT service providers has also firmly established the company in the Computing and Communications sector, forging partnerships to develop innovative, industry-leading solutions and a reputation for resolving the toughest issues.

Education and Development Services organisations (including the Midlands largest vocational training college running a 14,000-user campus network), Retail, Transport and Logistics, Marketing and Market Research, Financial and Legal Services companies and independent consultancies have all benefited from **illumit**'s distinctive approach and wealth of expertise.
